Senior Software Engineer | Flutter Team Lead | Spec-Driven Development

SUMMARY

Software engineer with **6 years** of Flutter experience, including **3 years** as a Team Lead. Deliver and maintain mobile and web products using Flutter, Dart, BLoC and Clean Architecture. Use OpenSpec for spec-driven development at [Carbee](#) and in recent freelance work on [PSX Ascend](#), defining requirements and implementation tasks before coding, review and QA validation.

TECHNICAL EXPERTISE

Mobile & web: Flutter, Dart, Swift, UIKit, responsive UI, asynchronous programming and streams.

Architecture & state: Clean Architecture, MVVM, SOLID, BLoC/Cubit, GetX, reusable components and maintainable code.

Data & integration: REST APIs, Firebase, Hive, cached_map, local persistence and caching, secure networking, token refresh and centralized error handling.

Product capabilities: Multi-tenant dealership/admin portals; user-app features controlled by Firebase configuration.

Delivery: Git, GitHub Actions, CI/CD, Jira, Kanban, requirements/design alignment, QA handoffs, code reviews, mentoring and Android/iOS releases.

Spec-driven development: Hands-on OpenSpec, ChatGPT/Codex and Figma MCP; researched BMAD Method and GitHub Spec Kit.

EXPERIENCE

Techtronix | Team Lead - Flutter & Mobile/Web Engineering | Mar 2024 - Present

- Led or directly handled approximately **40%** of [Carbee](#)'s overall development and contributed to approximately **70%** of its existing web-portal work.
- Delivered [Carbee](#)'s dealership and admin portals using Flutter and BLoC; maintain both and ship new modules for the Australian multi-tenant product.
- Use OpenSpec to define requirements and implementation tasks for recent features, guide AI-assisted development, and validate changes through code review and QA.
- Created [carbee_foundation](#) using spec-driven development; used Figma MCP to translate typography, theming and core UI components into Flutter.
- Built custom screen-responsiveness foundations and implemented encryption handling, network interceptors, centralized errors and request/response tracing.
- Align requirements with design, plan work in Jira, mentor developers, and own CI/CD, QA handoffs, release validation and deployment.

AT-Tech | Software Engineer, Flutter and Native iOS | Jun 2022 - Mar 2024

- Enhanced production native-iOS features for [Dr.iQ](#), a UK digital healthcare product serving NHS patients, working alongside the iOS team.
- Contributed to architecture refactoring, Firebase integration, persistence, notifications and iOS deployment workflows.
- Led the [PSX Ascend](#) migration initiative from native iOS to Flutter for Android and iOS, retaining core product functionality.

EARLIER EXPERIENCE

Heuristify | Flutter Developer | Jan 2022 - Jun 2022

- Led [Invoice Labs](#) redevelopment from native Android to Flutter for Android, iOS and Linux; implemented local persistence and delivered a stable Google Play release.
- Mentored product-team members and interns through implementation and code review.

SBS | Associate Software Engineer | Nov 2020 - Jan 2022

- Developed and deployed 8+ cross-platform Android/iOS applications.
- Enhanced [LSUK](#) with travel-distance calculation, UI improvements, feature delivery and architecture cleanup for its UK interpreter workflows.

Independent | Freelance Mobile App Developer | Aug 2019 - Sep 2020

Delivered mobile development work for Android and iOS.

SELECTED PRODUCTS & FREELANCE WORK

PSX Ascend | Freelance Flutter development

Delivered later feature work using Flutter and BLoC. Apply OpenSpec to recent features, defining requirements and implementation tasks before coding and validation. Separate from the earlier migration work at AT-Tech.

Ayuda Health | Flutter healthcare application

Contributed to a patient-engagement application built with BLoC/Cubit.

Dr.iQ | Native iOS healthcare

Production iOS engineering and architecture refactoring for online healthcare consultations and patient services.

Carpool | Co-founder | Flutter and Android

Co-founded [Carpool](#), a live Flutter/GetX carpooling product; contribute to development and ongoing maintenance. Apply AI-assisted, specification-driven development from architecture through release and iteration.

Afterlife AI and Cam Translator | AI-related mobile experience

Worked on [Afterlife AI](#), an avatar creation and chat application, and [Cam Translator](#), a Google ML Kit-based camera application for text/object recognition and translation.

My Treats and LSUK | Released mobile applications

Restaurant ordering and delivery applications for [My Treats](#) in Bristol, and interpreter workflows for [LSUK](#).
