

Muhammad Ikram UI Haq

Senior Software Engineer | Flutter Mobile and Web | Native iOS

Islamabad, Pakistan | +92 309 525 1250 | emikramulhaq@gmail.com

LinkedIn | Project portfolio on GitHub | Open to on-site, hybrid and remote opportunities

Professional profile

Senior Software Engineer with 5+ years of experience, currently working as Tech Lead — Flutter & Mobile/Web Engineering. Bring 3+ years of team leadership alongside hands-on delivery of Flutter applications for Android, iOS, and web, with additional native iOS experience in Swift and UIKit. Own features from architecture and API integration through testing, release, and production support. Combine strong implementation skills with mentoring and cross-functional delivery, with a strong interest in technical leadership and project management.

Core capabilities

Application development: Flutter, Dart, Android, iOS, Flutter Web, Swift, UIKit, BLoC/Cubit, responsive UI, asynchronous programming and streams.

Architecture and integration: Clean Architecture, MVVM, SOLID, REST APIs, JSON, Firebase, secure networking, encryption and error handling.

Platform and data: GCD, async/await, CoreData, UserDefaults, APNs/FCM, Sqflite and SharedPreferences.

Engineering delivery: GitHub Actions, CI/CD, environment management, App Store and Google Play delivery, testing, code reviews and production support.

Leadership and ways of working: Mentoring, feature planning, Jira, Kanban/Scrum, QA coordination, AI-agent-assisted and spec-driven development.

Professional experience

Techtronix | Tech Lead — Flutter & Mobile/Web Engineering | Mar 2024 – Present

- Lead Carbee's Flutter Web team as primary owner of admin and dealership portals; continue supporting Android/iOS applications alongside web delivery.
- Design and implement reusable architecture, secure API integrations, network interceptors, centralized error handling, request/response tracing, and encryption services.
- Gather requirements and plan delivery in Jira; own CI/CD, QA handoffs, and releases across development, staging, and production.
- Remain hands-on in feature delivery while reviewing code, mentoring engineers, guiding architecture decisions, and running bi-weekly Flutter learning sessions.

AT-Tech | Software Engineer, Flutter and Native iOS | Jun 2022 – Mar 2024

- Enhanced production native-iOS features and modules for Dr.iQ, a UK digital healthcare product serving NHS patients, working alongside the iOS team.
- Contributed to a major codebase refactor for maintainable architecture, alongside Firebase, persistence, notifications, and iOS deployment workflows.
- Led the PSX Ascend migration initiative from an existing native iOS application to Flutter for Android and iOS, retaining core product functionality.

Earlier experience

Heuristify | Flutter Developer | Jan 2022 – Jun 2022

- Led Invoice Labs redevelopment from native Android to Flutter for Android, iOS, and Linux; implemented local persistence and delivered a stable Google Play release.
- Mentored product-team members and interns through implementation and code review.

SBS | Associate Software Engineer | Nov 2020 – Jan 2022

- Developed and deployed 8+ cross-platform Android/iOS applications.
- Enhanced LSUK with travel-distance calculation, UI improvements, feature delivery, and architecture cleanup for its UK interpreter workflows.

Independent | Freelance Mobile App Developer | Aug 2019 – Sep 2020

Delivered mobile development work for Android and iOS.

Selected products and initiatives

Carbee | Flutter Web and mobile product delivery

Lead admin and dealership portal engineering within an automotive product spanning mobile and web. Own shared foundations and delivery workflows. Product website.

Dr.iQ | Native iOS healthcare

Production iOS engineering and architecture refactoring for online healthcare consultations and patient services. View on the App Store.

Carpool | Independent Flutter and Android product

Independently developed and maintain a live local carpooling product. Use it to apply AI-agent-assisted, spec-driven development from specification and architecture through release and iteration. View on Google Play.

Afterlife AI and Cam Translator | AI-related mobile experience

Worked on Afterlife AI, an avatar creation and chat application, and Cam Translator, a Google ML Kit-based camera application for text/object recognition and translation.

My Treats and LSUK | Released mobile applications

Restaurant ordering and delivery applications for My Treats in Bristol, and interpreter workflows for LSUK. My Treats on the App Store · LSUK on the App Store.

Education

Bachelor of Computer Science

Federal Urdu University, Islamabad | 2016–2020 | CGPA 3.59
