LinkedIn | Project portfolio on GitHub | Open to on-site, hybrid and remote opportunities

Professional profile

Senior Software Engineer currently working as Tech Lead — Flutter & Mobile/Web Engineering, with 5+ years of experience and 3+ years of team leadership. Combine hands-on Flutter mobile and web engineering with architecture, mentoring, and release ownership. Lead delivery across engineering, QA, and product stakeholders. Seeking Tech Lead opportunities, with a strong interest in project management and team development.

Core capabilities

Technical leadership: Architecture guidance, feature planning, mentoring, code reviews, engineering standards and cross-functional collaboration.

Application engineering: Flutter, Dart, Android/iOS and web applications, Swift/UIKit, BLoC/Cubit, Clean Architecture, MVVM and SOLID.

Integration and reliability: REST APIs, JSON, Firebase, secure networking, encryption, centralized errors and request/response tracing.

Delivery ownership: GitHub Actions, CI/CD, release validation, multi-environment architecture, versioning and production support.

Team workflows: Jira, Kanban/Scrum, QA handoffs, GitHub–Jira automation, technical documentation, AI-agent-assisted and spec-driven development.

Professional experience

Techtronix | Tech Lead — Flutter & Mobile/Web Engineering | Mar 2024 – Present

- Lead Carbee's Flutter Web team and serve as primary technical owner of admin and dealership portals, coordinating decisions with mobile, backend, QA, and product stakeholders.
- Gather requirements, guide technical planning and architecture, and review code while contributing hands-on; mentor developers and run bi-weekly Flutter learning sessions.
- Establish shared foundations for networking, encryption, centralized errors, and environment configuration to improve consistency across application development.
- Own release practices, CI/CD, and GitHub–Jira automation; introduced Kanban workflows and coordinated QA handoffs, validation, and production deployment.

AT-Tech | Software Engineer, Flutter and Native iOS | Jun 2022 – Mar 2024

- Enhanced production native-iOS features and modules for Dr.iQ, a UK digital healthcare product serving NHS patients, working alongside the iOS team.
- Contributed to a major codebase refactor for maintainable architecture, alongside Firebase, persistence, notifications, and iOS deployment workflows.
- Led the PSX Ascend migration initiative from an existing native iOS application to Flutter for Android and iOS, retaining core product functionality.

Earlier experience

Heuristify | Flutter Developer | Jan 2022 – Jun 2022

- Led Invoice Labs redevelopment from native Android to Flutter for Android, iOS, and Linux; implemented local persistence and delivered a stable Google Play release.
- Mentored product-team members and interns through implementation and code review.

SBS | Associate Software Engineer | Nov 2020 – Jan 2022

- Developed and deployed 8+ cross-platform Android/iOS applications.
- Enhanced LSUK with travel-distance calculation, UI improvements, feature delivery, and architecture cleanup for its UK interpreter workflows.

Independent | Freelance Mobile App Developer | Aug 2019 – Sep 2020

Delivered mobile development work for Android and iOS.

Selected products and initiatives

Carbee | Flutter Web and mobile product delivery

Lead admin and dealership portal engineering within an automotive product spanning mobile and web. Own shared foundations and delivery workflows. Product website.

Dr.iQ | Native iOS healthcare

Production iOS engineering and architecture refactoring for online healthcare consultations and patient services. View on the App Store.

Carpool | Independent Flutter and Android product

Independently developed and maintain a live local carpooling product. Use it to apply AI-agent-assisted, spec-driven development from specification and architecture through release and iteration. View on Google Play.

Afterlife AI and Cam Translator | AI-related mobile experience

Worked on Afterlife AI, an avatar creation and chat application, and Cam Translator, a Google ML Kit-based camera application for text/object recognition and translation.

My Treats and LSUK | Released mobile applications

Restaurant ordering and delivery applications for My Treats in Bristol, and interpreter workflows for LSUK. My Treats on the App Store · LSUK on the App Store.

Education

Bachelor of Computer Science

Federal Urdu University, Islamabad | 2016–2020 | CGPA 3.59
