

Muhammad Ikram UI Haq

Senior Software Engineer | Tech Lead | Technical Delivery

Islamabad, Pakistan | +92 309 525 1250 | emikramulhaq@gmail.com

LinkedIn | Project portfolio on GitHub | Open to on-site, hybrid and remote opportunities

Professional profile

Senior Software Engineer working as Tech Lead — Flutter & Mobile/Web Engineering, with 5+ years of experience and 3+ years of team leadership across Flutter mobile and web applications. Coordinate requirements, feature planning, QA handoffs, and releases with engineering and product stakeholders. Strong interest in technical project management, combining hands-on engineering with structured coordination, delivery ownership, and process improvement.

Core capabilities

Planning and coordination: Requirements translation, feature planning, ticket grooming, sprint planning, priority coordination and stakeholder communication.

Delivery management: Jira, Kanban/Scrum, QA coordination, release validation, versioning, deployment tracking and production handoffs.

Process improvement: GitHub—Jira automation, CI/CD workflows, environment promotion and development-to-release process ownership.

Team leadership: Mentoring, code reviews, architectural guidance, knowledge sharing and collaboration across product, backend, mobile and QA teams.

Technical foundation: Flutter/Dart mobile and web, Swift/UIKit, REST APIs, Firebase, Clean Architecture, AI-assisted planning and spec-driven development.

Professional experience

Techtronix | Tech Lead — Flutter & Mobile/Web Engineering | Mar 2024 – Present

- Lead delivery for Carbee's Flutter Web team, coordinating admin and dealership portal work with mobile, backend, QA, and product stakeholders.
- Gather requirements and translate them into feature plans and Jira work items; coordinate ticket grooming, sprint planning, Kanban workflows, and implementation discussions.
- Own development-to-deployment processes covering QA handoffs, versioning, release validation, and production deployment; identify and address workflow gaps.
- Introduce GitHub—Jira automation for branch/ticket linking, status transitions, and deployment tracking while remaining hands-on in engineering and mentoring.

AT-Tech | Software Engineer, Flutter and Native iOS | Jun 2022 – Mar 2024

- Enhanced production native-iOS features and modules for Dr.iQ, a UK digital healthcare product serving NHS patients, working alongside the iOS team.
- Contributed to a major codebase refactor for maintainable architecture, alongside Firebase, persistence, notifications, and iOS deployment workflows.
- Led the PSX Ascend migration initiative from an existing native iOS application to Flutter for Android and iOS, retaining core product functionality.

Earlier experience

Heuristify | Flutter Developer | Jan 2022 – Jun 2022

- Led Invoice Labs redevelopment from native Android to Flutter for Android, iOS, and Linux; implemented local persistence and delivered a stable Google Play release.
- Mentored product-team members and interns through implementation and code review.

SBS | Associate Software Engineer | Nov 2020 – Jan 2022

- Developed and deployed 8+ cross-platform Android/iOS applications.
- Enhanced LSUK with travel-distance calculation, UI improvements, feature delivery, and architecture cleanup for its UK interpreter workflows.

Independent | Freelance Mobile App Developer | Aug 2019 – Sep 2020

Delivered mobile development work for Android and iOS.

Selected products and initiatives

Carbee | Flutter Web and mobile product delivery

Lead admin and dealership portal engineering within an automotive product spanning mobile and web. Own shared foundations and delivery workflows. Product website.

Dr.iQ | Native iOS healthcare

Production iOS engineering and architecture refactoring for online healthcare consultations and patient services. View on the App Store.

Carpool | Independent Flutter and Android product

Independently developed and maintain a live local carpooling product. Use it to apply AI-agent-assisted, spec-driven development from specification and architecture through release and iteration. View on Google Play.

Afterlife AI and Cam Translator | AI-related mobile experience

Worked on Afterlife AI, an avatar creation and chat application, and Cam Translator, a Google ML Kit-based camera application for text/object recognition and translation.

My Treats and LSUK | Released mobile applications

Restaurant ordering and delivery applications for My Treats in Bristol, and interpreter workflows for LSUK. My Treats on the App Store · LSUK on the App Store.

Education

Bachelor of Computer Science

Federal Urdu University, Islamabad | 2016–2020 | CGPA 3.59
